Post LANAP® Treatment Diet Instructions

- Following Laser Therapy, do not drink through a straw, spit, or rinse for 24 hours as this creates a vacuum in your mouth that can disturb the blood clots that form and act as a band-aid to help stop bleeding.
- You will be prescribed 3 prescriptions:
 1. Antibiotics are to be taken for 7 days and completed through.
 2. A pain reliever is to be taken as directed.
 3. A mouth rinse is to be used for only 10 days, twice per day. After 10 days, a warm salt water rinse is to be used 3 times per day.
- For 2 weeks following surgery, please stick to a soft diet as suggested below.
- After surgery, you may see a white film develop around the area. Do not wipe it away. Leave the area alone. The film is a part of the healing process.
- **Please remember** that even after 10 days, healing is not complete. The first month following treatment, please continue to make smart food choices and follow a diet consisting of softer foods.

Soft Diet Suggestions

Daily Vitamins!

Food put through a food blender
